

## Inspection Report

Hollywild Animal Park Inc  
2325 Hampton Rd  
Wellford, SC 29385

Customer ID: 9275

Certificate: 56-C-0115

Site: 001

HOLLYWILD ANIMAL PARK INC

Type: ROUTINE INSPECTION

Date: Feb-02-2016

### 3.4 (c) REPEAT

#### OUTDOOR HOUSING FACILITIES.

The two pairs of wolf hybrids in two separate enclosures were moved to different enclosures since the last inspection, but the wooden fence posts in these enclosures were not cleaned of the green algae and sealed to be water impervious. All building surfaces in contact with dogs in outdoor housing facilities must be impervious to moisture in order to maintain the husbandry standards.

### 3.125 (a) REPEAT

#### FACILITIES, GENERAL.

Along the front fence line of the enclosure behind the USDA barn in the deer forest, is a concrete culvert to drain water from the pasture above it. The dirt has totally eroded from around the culvert leaving a three foot hole. This area needs to be repaired to prevent potential injury to the animals.

### 3.127 (d) REPEAT

#### FACILITIES, OUTDOOR.

Although holes at the bottom of the perimeter fence along the service road were repaired, there are still multiple areas of the perimeter fence with gaps, low fencing, or loose tension wires. These areas include: a large tree fell last week on the fence near the wolf hybrids; the chain link fence near the USDA barn varies from 4 to 5 foot in a few areas (the perimeter fence variance states the lower fence will be six feet with two additional feet of other fencing); the two feet of additional fencing consisting of high tensile wire and black coated wire is loose or unattached in several areas along the entrance road; the bottom of the fence along the entrance road is loose in numerous places leaving gaps up to a foot. The perimeter fence which also serves as a primary enclosure fence for many animals in the deer forest needs to be repaired or replaced, and inspected and maintained on a regular basis. Maintenance of the perimeter/enclosure fence is needed to prevent escapes and to keep animals and unauthorized people out.

Exit interview conducted with facility representatives and VMOs Lisa MacElderry, D.V.M. and Robert Brandes, D.V.M.
